Lookingglass Creek Hourly Bid (CTUIR)

Area Description:
Project area is located northwest of Elgin, approximately 35 miles north of La Grande on Lookingglass Creek. The treatment area is 580 acres and has been consistently treated since 2015. The project is located on CTUIR (Confederated Tribes of the Umatilla Indian Reservation) land and will be an all noxious weed treatment, however, the highest priority species is meadow hawkweed; **not to exceed $8,000.** This project is easily accessible by ATV/UTV, but actual treatment areas (especially hawkweed) is located in dense shrubs and will need to be done on foot. There is an adjacent piece of private land that Tri-County will have permission to treat on. **Please fill out the hourly bid rate sheet attached in you are interested in this project.**

Approved Herbicides:
Tri-County will provide all herbicides, surfactants, and dyes needed to complete this job

Treatment Timing: June 2020

Contractor’s Responsibilities:
- Identification of meadow hawkweed, thistles, sulfur cinquefoil and houndstongue.
- Supplying all personnel and equipment necessary for the job to be completed.
- At least a 90% treatment (dead or blue) of all weeds identified within the project area.
- Provide all treatment records, invoice, track logs, point, and/or polys need to be submitted to Tri-County post treatment for approval prior to payment.
- Any photo points requested by Tri-County CWMA should be submitted within a timely manner following project completion.

Tri-County’s Responsibilities:
- Acquire landowner permission for entering property.
- Upload or send to contractor’s GPS all required points and track logs, along with any maps requested by contractor.
- Provide all herbicide, surfactant, and dye.
- Inspect project just prior to completion to allow the contractor to correct any missed plants before the contractor leaves the site.
- Contractor will be paid in full within 60 days of project completion approval by Tri-County staff.
