J&M Fluidics offers...

Process Pump VFD Controllers

Bringing Pump Control to a Higher Level!

The VLT® HVAC Drive has been designed to offer flexible, intelligent control of pumps, making it even easier to optimize cooling capacity with constant temperature and pressure levels for water chillers, and other typical pump applications in HVAC.

FEATURES:

• Energy efficient control of pumps
• Precise control of pressure and flow
• Ensures maximum economy and low running cost
• Standard interface with J&M software – this option can be added at anytime with hardware install

Dual Process Pump Package using VFD Controllers
